BOX FEEDING SYSTEMS FOR HORSES

Roughage and concentrated feed supply

The importance of administrating many small amounts of roughage, as recommended by scientists, is still underestimated in box feeding. Set yourself apart with your farm and make this essential feeding method possible and even reduce your workload by providing large bales:

- Individually configurable for each box
- Can provide many small meals over 24 hours
- Presentation of large bales reduces workload
- Natural feeding posture
- Calmer behaviour and less stress due to group feeding
- Flexible working hours

Benefit from our many years of experience!

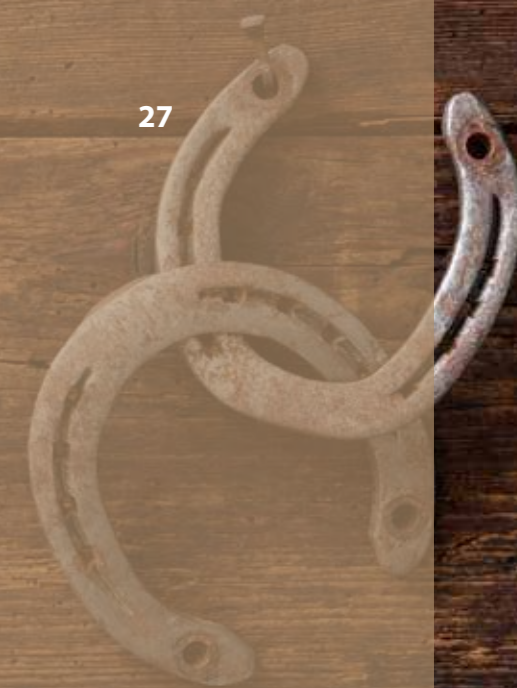

**Schauer - your strong partner
for your success in the stable**

CompidentHorse 01.03.2023 07:18:37

The advantages are obvious

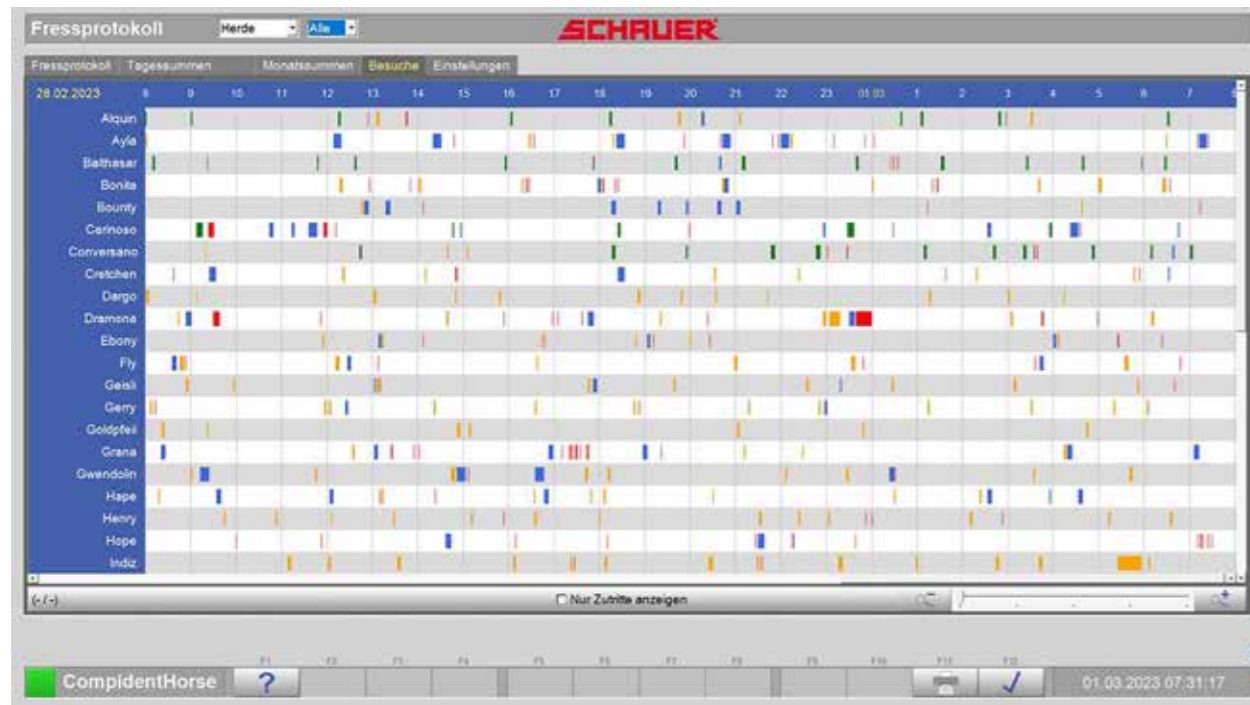

Unlimited number of individual daily routines

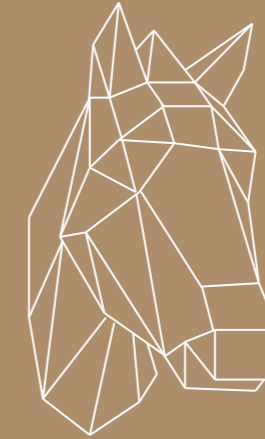

If the animal is not in the box, the feed does not lapse, but is divided evenly over the rest of the day

4

Box Feeding Programme - *Feed Protocol*

The advantages are obvious

Recording of feeding times as log and as graph

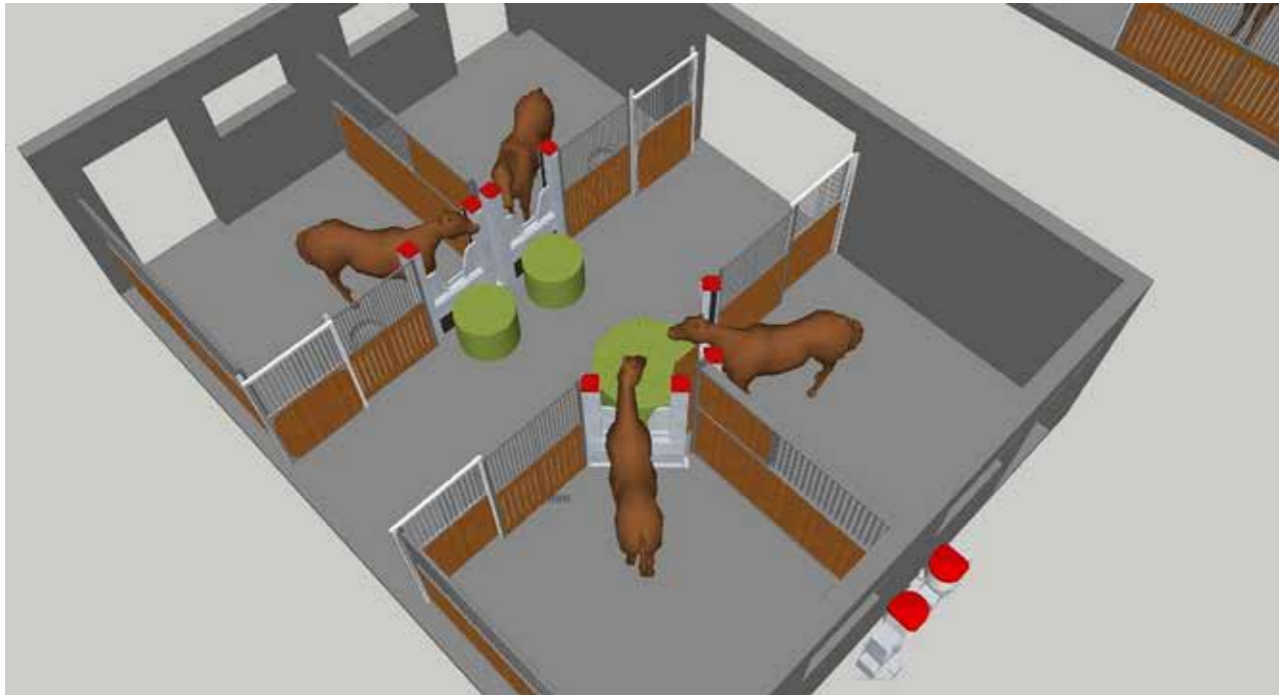

Optional monitoring of drinking behaviour
