The active stable - *Active Horse Systems*

www.active-horse.com

The advantages are apparent

- **for the horse:**
Social contact, light and fresh air,
as well as movement and small feed portions
- **for the owner:**
flexible working hours, reduced workload, better feed
conversion
- **for the rider:**
Balanced, healthy and efficient horses

1

*sensor-monitored
input area*

*up to 6 energy and 2 mi-
neral feed dispensers +
Liquid dispenser*

*Each station can
be provided with a
directional setting*

*closed rubber wing
door prevents crowding*

robust and stable design

Compident Horse - *Concentrated feeding station*

The benefits are clear

provides horses with different menus and quantities based on individual requirements (age, race, performance, etc.) - for each individual animal

All parameters (dosing speed, dwell time, etc.) can be set for each horse

Concentrate feeding station with selection

various silo variants

Ground-level feeding - grazing step

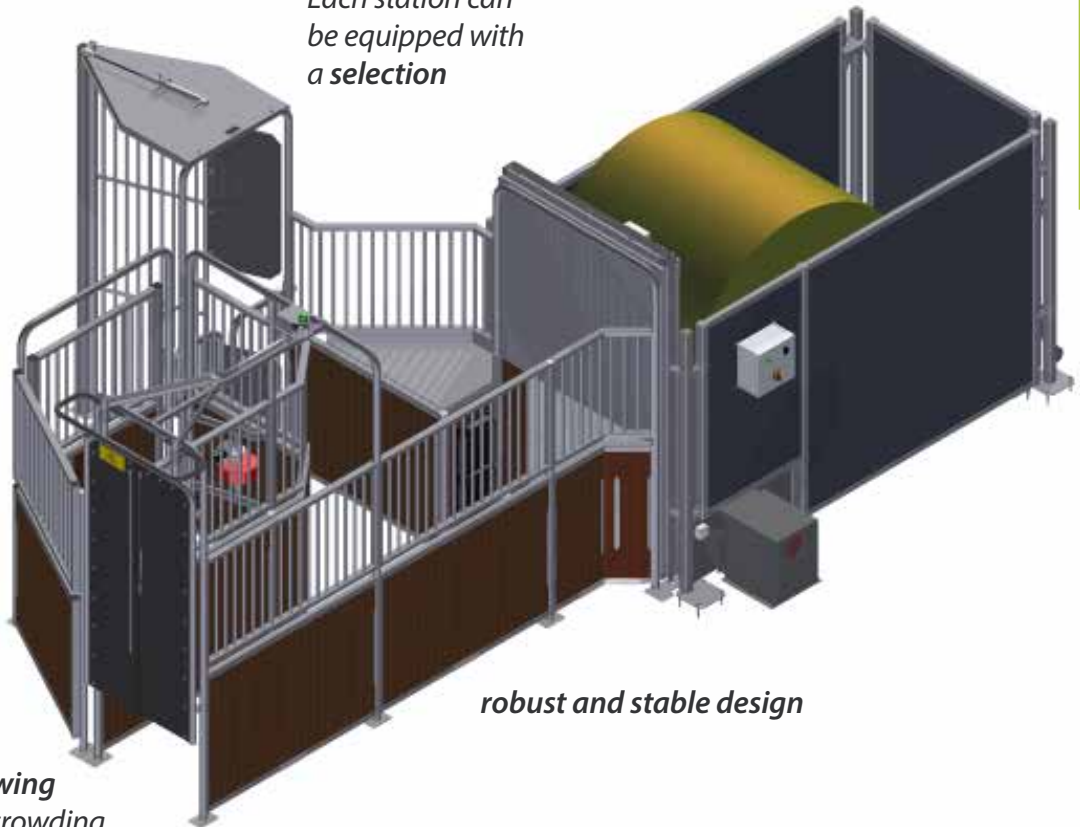

2

Roughage feeder optional

Each station can be equipped with a selection

sensor-monitored entry area

robust and stable design

closed rubber wing door prevents crowding

Compident Horse- *Rough feeding station*

- rationed roughage supply
- individual animal

Functional concept:

- quiet feeding for old / lower rank horses
- accurate care of allergy sufferers, Cushing-, laminitis-horses, etc.
- Feed stimulus for horses, which need it

Roughage feeding station:

- suitable for round and square bales
- functionally reliable and comfortable
- Automatic feeding of the bale
- substantial work relief

3

*sensor-monitored
entry area*

*closed rubber
wing door pre-
vents overfeeding*

Everything in one place

*concentrated feed
roughage
selection options*

*Each station can be
equipped with
a selection*

*Roughage
headboard*

*2 types of concentrated
feed - both can be dosed
simultaneously*

robust and stable design

Compident Horse- *DUO Station*

The advantages are apparent:

- Ground-level feeding - grazing step
- several small meals a day
- individual treatment of animals
- designed for smaller groups or as an extension for existing businesses

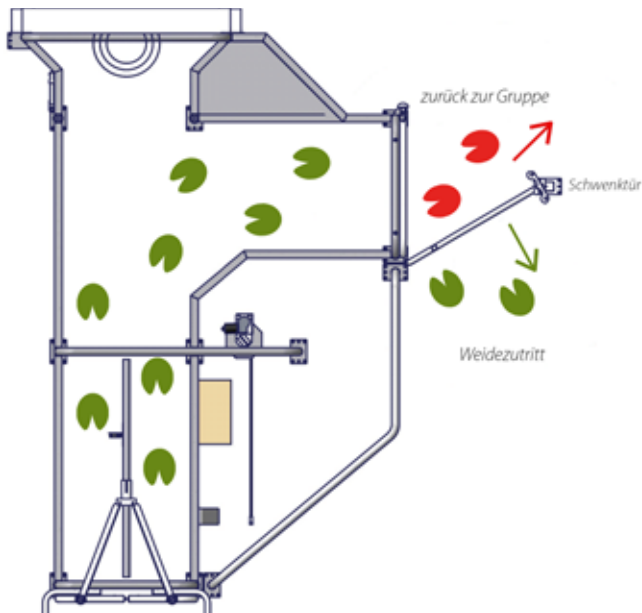

Concentrated feed and roughage feed

Compident Horse Duo Station

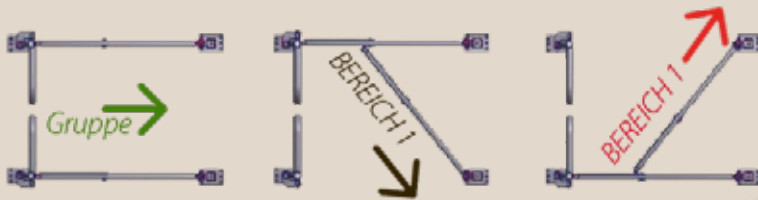

Compident Selection

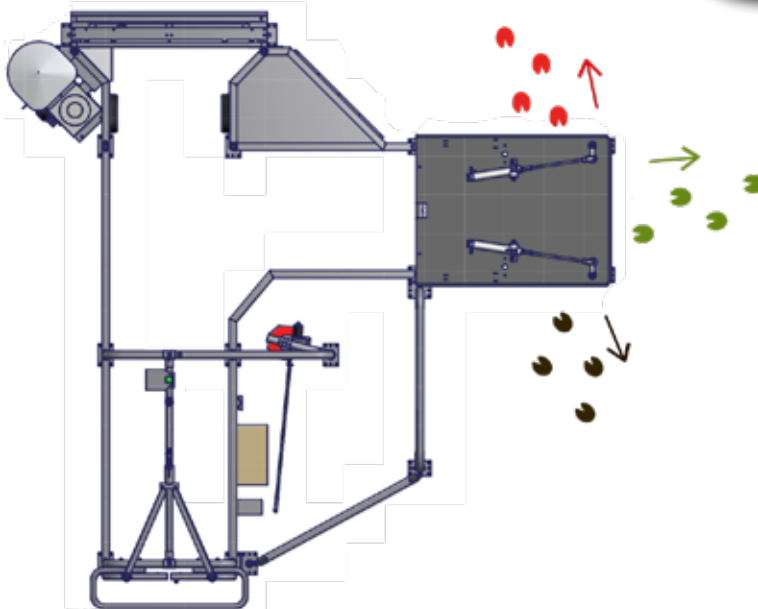

- Selection at each feed station is possible
- Selection areas are individually and flexibly configurable:

- hayracks
- Timed roughage elements
- pasture access
- VIP areas
- unbeatable value for money
- higher throughput at the feeding station

Compident Selection Plus

group or 2 areas

- Selection at each feeding station possible
- Selection in various areas possible:

- Group housing
- pasture access
- VIP areas
- etc.

Time controlled roughage element

4

- for roughage supply to groups
- in selected areas
- various installation alternatives available
- manual and / or TOPO (feeding computer)

Solutions for ad libitum area

5

modular

- flexibly combinable elements
- can be used as hay and straw rake
- size varies, depending on the number of horses
- complete with net and matching frame

Safety fence

- for use in single and group housing
- ideal for roughage areas in the movement stable
- eating together
- ground-level feeding
- feed hygiene
- made to measure according to customer requirements

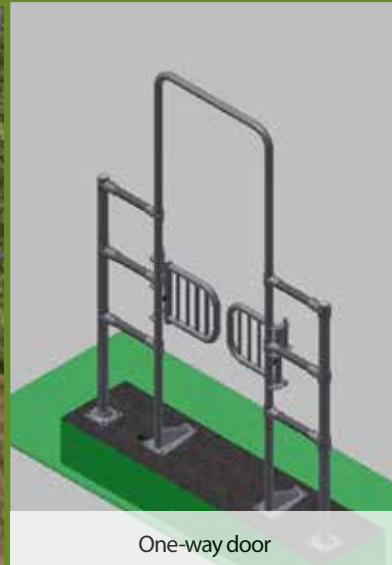

Pasture access door

several variants available

Pasture access door

One-way door

- automatic door for timed access of the group to a specific area (pasture, hay, etc.)
- Times can be set via TOPO (feeding computer) as well as via a standard time controller
- Return to the group via a one- way door
- numerous installation variants available

TOPO-Feeding computer

Remote maintenance - Detection technology

- all components developed and produced in-house
- Horse feeding management
- Recording of all data
- Management of all selection options
- Interfaces allow remote control and maintenance over the Internet

Recognition variants:

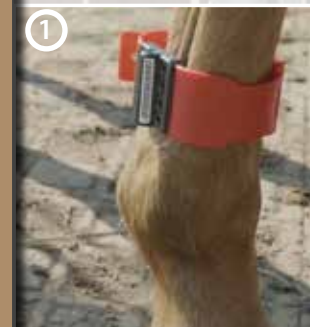

- ① ground antenna: foot strap with transponder - fast and secure detection and for ease of learning
- ② trough antenna: collar or chip in the mane

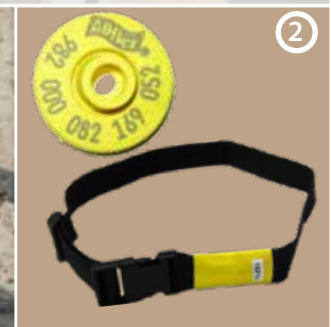

TOPO / remote maintenance

Radio remote control –
comfortable and unrivalled - for being easy to learn

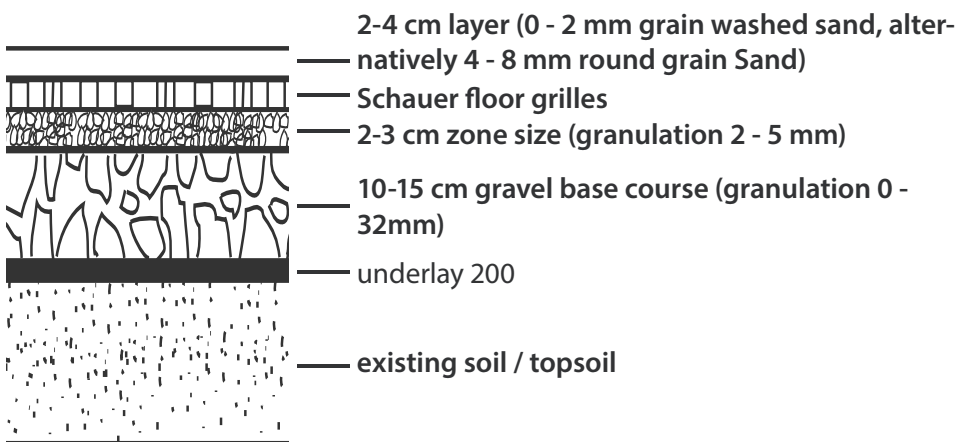

① Foot band with transponder

② Mane chip + collar

Floor grilles

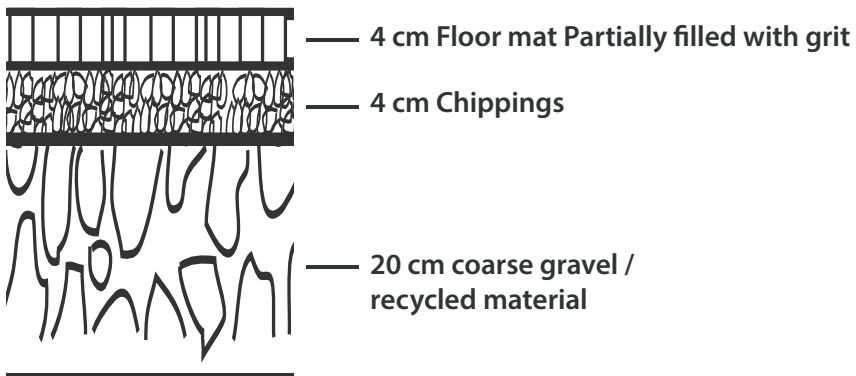

Schauer - floor grilles

the ground attachment for sand traps

- UV and frost resistant
- Resistant to gasoline, de-icing salts, ammonia
- Environmentally neutral
- 100% recyclable

Floor mat

Schauer - floor mat *for mechanical manure*

- Easy to lay - end to end
- works with mechanical manure removal systems
- non-slip

Solarium

Advantages are obvious:

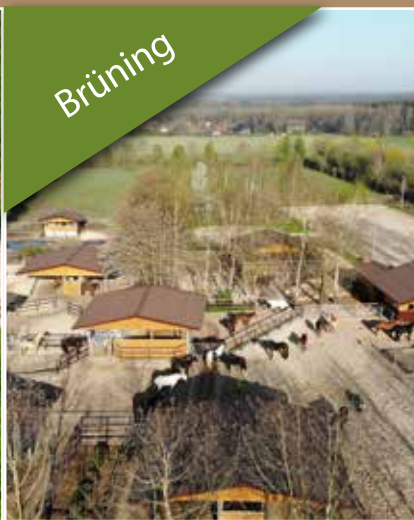

- Natural Vitamin D3 formation
- Strengthening the immune system
- Stabilization of circulation, increased blood flow
- Faster degradation of lactic acid
- Stimulation of appetite
- Increase in muscle tone

Active stable - *current concepts*
