## CLEAN & SAFE FEEDING - EVEN WITH LARGE QUANTITIES OF FEED

Save time and money with the newly designed Schauer FARO feed pusher robot!

FARO combines all the essential functionality of similar devices currently on the market, but has much more to offer with its optional concentrate feeder.

The robotic feed pusher from Schauer cannot only supply silage to the feed fence in both directions, but also optionally add up to two types of concentrated feed as required.

The FARO Smart App makes it easy and convenient to manoeuvre and train the robot.

Functionality that will inspire you completely!

The actively driven drum makes it possible to push the feed to the left and right, saving idle time and energy. The **self-cleaning mechanism** guarantees a hygienic feeding process.

Feed residue can easily escape through the automatic opening of the scraper bar during pushing.

A safety switch strip and dynamic overcurrent detection ensure safe operation.

Farming 4.0 - FARO is part of it!

Operating status and log data are recorded automatically and can be called up at any time.

The FARO feed pusher robot can be **put into operation quickly and easily**, without any installation work on the feed table, and does not require any conversions.

## SAVES TIME AND PROMOTES THE HEALTH OF YOUR COWS

### + FARO - Key Advantages:

- No empty runs – pushing is possible during forward and backward travel due to 2 ultrasonic sensors and actively driven drum
- FARO robot data can be called up at any time – smart control via app
- Cleanliness at the feeding table
- self-cleaning mechanism
- Significant cost and time savings
- Bait feeding with optionally mounted concentrate feeder
- Increased milk production and higher yields

THE ALL-IN-ONE  
ROBOTIC FEED PUSHER  
FOR EFFICIENT CATTLE FEEDING!
