THE NEXT GENERATION FEEDING COMPUTER FROM SCHAUER

Qanto – the next generation feeding computer - from SCHAUER Agrotronic for safe and functional feeding management

Schauer has been developing and producing feeding computers in-house for more than 45 years and thus offers our customers an extended product service life and support over decades that is unique. In order to make the technological progress in the implementation of the possibilities and demands of professional animal owners worldwide usable, Qanto - the next generation feeding computer - has now been developed.

Above all, it offers a high level of protection against dust and moisture and is perfect for the use in the stable office. A modern architecture and the use of SSD hard drives make the new Qanto fast and secure. The „WideScreen Monitor“ in HD resolution (16: 9) now enables a 50% larger screen surface and thus more functionally connected windows to be displayed on the monitor at the same time. Everything at a glance, that simplifies working on the feeding computer. The new software VFPig6 makes it possible. Additional valuable, pre-programmed queries for individual parameterization quickly and compactly show status information about the eating behaviour and consumption of individual groups of animals.

The new Qanto now enables several identical or different programs for Spotmix, Liquimix, Drymix, Babyfeed, Compident or MamaDas feeding systems to be combined and operated on one device. Connectivity to mobile devices and optional cloud storage are possible.

Qanto – a quantum leap in terms of modern feeding management from SCHAUER Agrotronic!

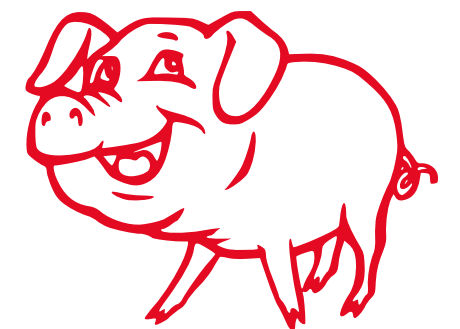

SAFE AND FUNCTIONAL FEEDING MANAGEMENT BY SCHAUER

Qanto - for the high demands of professional animal owners worldwide:

- High level of protection against dust and moisture due to its compactly developed housing
- Perfect for use in the stable office
- Modern architecture and fast and safe use due to high-quality SSD hard disks
- Convincing working comfort on the screen: + 50 % of the screen area through the use of a „WideScreen Monitor“ in perfect HD resolution
- Focus on the essentials through pre-programmed queries and the use of the brand new „VFPig6“ software
- Individually adjustable to your own needs and wishes
- Almost any combination of proven SCHAUER feeding systems on one device is possible
- Accessible via a mobile application anywhere in the WLAN of the barn
- Optional cloud storage: If desired, the data can be accessed at any time and from anywhere in the world

A QUANTUM LEAP IN MODERN AND UNIQUE FEEDING TECHNIQUE FROM SCHAUER-AGROTRONIC!

THE PERFECT SOLUTION FOR YOUR ANIMALS

AN INNOVATIVE COORDINATED OVERALL SYSTEM

▶ Spotmix multiphase feeding

Saves feed costs and earns more money in pig keeping - innovative technology for automatic wet feeding

With Spotmix SCHAUER once again demonstrates its high competence and precision in feeding technology.

- Daily adjusted energy and protein amounts for each animal or each group
- Perfect multiphase feeding even with ad libitum sensor feeding
- The patented process ensures best possible hygiene as no residues of any kind are left in the system

▶ Compident - electronic sow feeding

Number 1 worldwide - professional group sow keeping for more than 30 years

Professional and animal - friendly, decades of experience make the difference.

- Up to 80 animals per station
- Flexible use in new and existing buildings
- Perfect sow management through sensationally user-friendly feeding software
- Automatic animal selection

▶ Liquid Feeding - Liquimix

Reduced feeding costs thanks to liquid feeding by phase feeding and reducing feed losses

- Significantly higher growth output (5.5 %)
- Lower feed losses (4.8 %)
- Increase in the weight of weaned piglets by 11 %
