MINIMUM OF WORKING TIME AND MAXIMUM OF TIME SAVING

The stationary mixer, the Feedo-Mix control and the feed belt are perfectly matched!

Time is money, leisure is gold. This applies to all dairy and cattle farms, large or small. The new Feedo feed belt has been developed to provide the supply of feed all-day at low cost with minimal labor requirements.

With this new and inexpensive mechanization for cattle feeding, the farmer saves a lot of time.

The narrow feed alley allows to get more space for the animals inside existing barns renovated. The Feedo feed belt can be filled either with an indoor crane, a stationary mixer or with a loading wagon or mobile feed mixer.

The feed belt is available individually from 60 cm (2 tons) to 210 cm (4 tons) width, tailored to your farm. A frequency controller enables you to adjust the speed at your preferred level.

The radio remote control enables convenient operation during filling.

Feedo feed belt will help you to treat yourself to a better quality of life for little money.
